

The 15th International FLINS Conference on Machine learning,
Multi agent and Cyber physical systems

August 26-28, 2022, Tianjin, China

Special Session on Applications, Theories and New Trends for Networked Systems

<https://flins2022.scievent.com/>

FLINS2022 is the fifteenth in a series of conferences on computational intelligence systems with focus on Machine learning, Multi agent and Cyber physical systems. The conference will be held in Tianjin, China.

FLINS 2022 proceedings will be again published as a book by the World Scientific and it will be again included in the ISI proceedings as previous ones, as well as be included in EI Compendex for indexing. Moreover, special issues of SCI indexed journals will be devoted to a strictly refereed selection of extended papers presented at FLINS 2022.

Scope and Motivation

Networked systems, such as multi-agent systems and complex dynamical systems, have been paid extensive attention since they can accomplish a variety of tasks cooperatively such as surveillance, reconnaissance, and exploration. Exploring the structure of and collective dynamics upon natural, social or artificial networked systems will help us better understand and apply such systems in our daily life. At present, artificial intelligence technology has developed very rapidly and has been used in various fields. The artificial intelligence technology has also been applied in the research of the networked system. This special session aims to stimulate studies pertaining to networked systems, including applications, theories, and new trends for such systems.

Important Dates

Special session proposals deadline	January 1, 2022
Full paper submission	February 28, 2022
Notification of acceptance	March 31, 2022
Camera-ready paper submission	April 15, 2022
Author registration	April 25, 2022
Conference Date	August 26-28, 2022
